

I have not read any good reasons for restricting Satelite radio and the programming they offer.Competition in the industry has no self destructive elements to it.

NAB's petition 04-160 carries no merit.

I would like choice in what I listen to on the radio and non-satelite radio does not provide that to me.

NAB's petition is self serving and does not serve the public good.

I respectfully urge you to toss out their proposals that restrict the public's choice of radio services.

Thank you for your kind consideration,

Charles T. Gartlan.
